### Attraction of researchers

One of the CFI's key objectives is to promote the attraction and retention of high-calibre researchers.

### Retention of researchers

One of the CFI's key objectives is to promote the attraction and retention of high-calibre researchers.

# Highly qualified personnel

_	

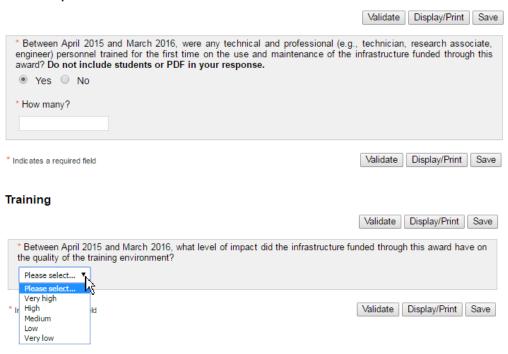

One of the CFI's key objectives is to expand research and job opportunities by providing high-quality research and training environments for highly qualified personnel (HQP), such as post-doctoral fellows (PDF), PhD, Masters and undergraduate students.

### Technical personnel

### Infrastructure quality

\* Indicates a required field

One of the CFI's key objectives is to increase Canada's capacity to carry out world-class scientific research and technology development.

### Useful life of infrastructure

Useful life is the period of time over which the infrastructure is expected to provide benefits and be usable for its intended purpose, factoring in normal repairs and maintenance.

### **Benefits for Canadians**

Environmental

Public health Social

Education/training

India

Organizational/human capital Political, legal or ethical

One of the CFI's key objectives is to support research that leads to social, economic and environmental benefits for Canada. Beyond academic accomplishments already addressed in previous questions (such as HQP training), describe the impacts and benefits which have been achieved related to the infrastructure funded through this award.

Detailed screen for this benefit, if selected from previous screen Benefit details You have identified New or revised policy, regulation, code, guideline as one of the benefits from your research. \* In language that can be understood by non-scientists, please provide more information about New or revised policy, regulation, code, guideline. Your answer should identify how your CFI-enabled research contributed to this outcome, identify who is benefitting and how it benefits them. When possible, include relevant quantitative data, such as cost savings, additional revenues, patients treated, individuals certified, etc. Here is an example of the type of information we are looking for: Dr. X advises policy-makers worldwide on establishing processes to govern Arctic waters. In 2009, he contributed to the XXX report which recommended numerous routes for strengthening ship safety and environmental protection and is helping Canada and other Arctic nations chart a course for future shipping through the environmentally fragile region. A new regional search and rescue agreement was recently concluded, and Canada is now working through international bodies to negotiate a Polar Shipping Code. 600 characters 0% [ \* Who is making use of this research result or technology development?
